

Compounding Consumables Data Sheet

Transfer Sets

Custom manufactured to suit the peristaltic pump, & design requirements, of your choice. BAXA & LEAD sets are stock items...both sets include male L/Lock + wings, to ensure operator fingers cannot touch the aseptic connection point.

Code #8-306 Lead Pump Set

Code # 8-305 BAXA Pump Set.

Pooling Bags

Custom designed to suit the end-user's requirement...the most popular design is the unique 3 litre pooling bag (which houses 2 x needleless ports + 1 x female L/Lock connector) ...ideal for aseptic compounding.

Spike Adaptors

Logikal's Spike Adaptors incorporate an IV Spike with safe finger grip & the needleless valve used incorporates a unique design that allows the valve to fully open when connected to a male L/Lok item. This feature results in nil obstruction to flow & facilitates safe and efficient drawing of fluids.

Code # 8-335 Kalpac Spike Adaptor.

PRODUCT FEATURES

All compounding consumables feature the following benefits:

- Materials used are medical grade,
- Assembly is undertaken in TGA audited Cleanroom,
- Sterilisation is by Gamma Irradiation,
- Packaging is poly/poly to accommodate ease of 'wipe down' & easy opening.
